Each year we are blessed to have a visiting team from our *Partner* church Centralia Community Church of God (WA). Pastor Elmer Goodeill has become a great friend, along with co-leaders Dr. Justin and Debrah Sherfey. When the Centralia group returns to Welcome Home, we are always happy to greet old friends, as well as meet newcomers.

As in previous years, the focus of the Centralia group was two-pronged: medical and puppet ministries. Twenty-four persons from the Centralia area and fourteen medical students from New York comprised the full group. The medical work was led by Dr. Sherfey and Dr. Chris Yarter of Centralia, and Dr. Sharon Barlizo of New York College of Podiatric Medicine. The medical students were divided into three teams, each led by one of the doctors and serving in various areas of our San Quintin valley area, including the community of Colonet. Doctors worked in clinic and community outreach settings and saw patients with a variety of general health concerns.
