NYCPM Professor of Pre-Clinical Sciences Zev Leifer, PhD Awarded “Best Poster” in the Category “Education” At Annual Meeting of Digital Pathology Association

A poster by NYCPM Professor of Pre-Clinical Sciences Zev Leifer, PhD, entitled “The Use of Virtual Microscopy, Slide Modification and a Wiki in Pathology Education” has been awarded “Best Poster” in the category “Education” at the annual meeting of the Digital Pathology Association held in San Antonio, Texas recently.

Dr. Leifer has been teaching pathology lab at NYCPM for 31 years. For the past several years, he has been using the Olympus Virtual Microscopy System. As an educational component, he put together an online Wiki (similar to Wikipedia) with which the students could take screen shots, edit them with arrows, circles, text and underlining, and cropping to show the desired feature. The wiki is available to anyone, to expand and edit. It can be found at <http://pathlab2014.wikifoundry.com/>
