College Work Study Utilization

College Work Study is awarded to students based strictly on an eligible need test.

1. This program is geared for students to work and earn supplemental funds to cover expenses while attending school. This program should provide students with funds to cover their carfare, pay for lunch, cover books and supplies and allow for some funds for extra down-time. NYCPM attempts to make this program available to as many students as possible who are eligible.

2. Students who are awarded work study need to solicit their jobs ASAP. They can review the work study job listings available in the office of Student Services.

3. If the student meets their allotment of funds then they need to stop working immediately and reapply for additional funding. Their request will be judged upon the availability of funds in the program.
