CONTEMPORARY APPROACHES - SEPTEMBER 18, 2022

General Tuition: \$99 - No refunds will be issued for this event.

OBJECTIVES •

Review dermatological cases for which a diagnosis is created

Recognize the differential diagnosis of pedal ulcerations

Identify bony pathologies in foot deformities

Consider the function topical oxygen plays in the wound healing cascade

Detect the characteristics that Down Syndrome plays in Podiatric intervention

Reconsider the potential roles antibiotics play in treating lower extremity infections

Discuss the features of Diabetic Peripheral Neuropathy that contribute to the function in the diabetic foot

Diagnose the different skin rashes in the young population

Appreciate the differences in evaluation of the Pediatric Flatfoot
