CONTACT AUDREY NEGRON WITH ANY QUESTIONS: ANEGRON@NYCPM.EDU / 212-410-8068
Objectives:

• To review cultural and socio-economic trends in medical outcomes

• To identify specific non-medical factors which influence the management of disease in minority communities.

• To discuss trends in diabetic limb pathology in the context of race and gender.

• To review updates on child and adult biomechanical abnormalities with treatment considerations for the attendee to employ in their daily practice.

• To review considerations in the evaluation of surgical and non-surgical treatment of Sagittal Plane deformity.

• To review current concepts in lateral ankle instability

• To grasp a better understanding of COVID-19 and multi-system inflammatory conditions in children

• To receive a refresher on surgical management of Hallux Hallux Abducto Valgus: Base Wedge Osteotomy V the Lapidus Procedure

• To review prophylactic diabetic foot surgery

• To re-familiarize the attendees with the clinical presentation and treatment options of some common and not so common skin conditions that affect the foot
