

Aman Safaei Chief Information Officer

Aman Safaei was appointed Chief Information Officer of NYCPM on October 15th, 2015. Aman has an extensive background in information technology, and possesses considerable skill in planning and aligning Information Technology strategies with business goals and objectives. He has many years of experience in building business solutions and has created and managed very large secure networks and technology infrastructures on an enterprise level as well as cloud-based operational environments. Aman has applied systems and technology methodologies to major industries such as lottery, racing, gaming, publishing, manufacturing, banking and military. He designed and developed a web site for Minnesota State Lottery, allowing residents to purchase lottery tickets in advance from their bank accounts. He has been granted several patents by USPTO for his innovative systems and methodologies in solving business problems. He started his career as a systems engineer for IBM World Trade Corporation and has served as project manager for Honeywell Information Systems.
