

Canadian Students Complete NYCPM Rotation

(From Left to Right) Dr. Trepal and Dr. Maurais present certificates to Jean-Phillipe R. Chamberland, Joanie Vermeersch, and Marie-Claude Racine

Three senior students from the Université du Québec à Trois Rivières (UQTR) spent eight (elective) weeks at NYCPM this winter, focusing on podiatric imaging, podopediatrics and podiatric medicine and surgery. We are expecting more students this summer. The three students who finished their rotation at NYCPM will next have relatively brief externships, receive their DPM degrees from UQTR and will go on to private practice in the province of Québec. They received certificates at a luncheon in their honor in late February. All three students remarked on the relatively warm weather here in New York, compared to their snowbound home!
