

COST OF ATTENDANCE

Along with tuition, students should estimate the overall cost of completing an academic year - or the Cost of Attendance (COA) - in your program.

The COA – or student budget – not only lets you see the big picture costs of your degree, but also serves to determine your financial needs and the amount of aid (federal loans and scholarships) for which you may qualify.

COA includes:

- **Direct costs** expenses that are paid directly to the University, such as tuition, fees, and on-campus housing and food.
- **Indirect costs** expenses not paid directly to the University, such as off-campus housing and food, transportation, personal expenses, books, and supplies.

Health Insurance - All on-ground students attending the New York College of Podiatric Medicine must carry comprehensive health insurance for the benefit of the university community. View the [NYCPM Student Health Insurance Plan](#), for enrollment, and waiver request information.

Your COA, and subsequent financial aid eligibility, is determined and calculated based on the academic year (semesters you are enrolled in classes).

While not specific to your circumstance, consider the information below as a sample Cost of Attendance for the Podiatry program. *
